Executive Summary

On 02/19/2026 law enforcement executed a search warrant in Case Number 26-T002 involving allegations of the creation, storage, and distribution of Child Sexual Abuse Materials (CSAM). I, Tytus Gonzalez ("Investigator"), was requested to review scene photographs and identify all digital evidence within the scope of the warrant for seizure and forensic processing.

The warrant authorized the seizure of workstations, laptops, tablets, mobile devices, computer peripherals, storage media, other electronic devices that may have storage, and written usernames/passwords, or anything related to the investigation. Based on the review of images IMG_3296.JPG, IMG_3297.JPG, and IMG_3298.JPG, eleven (11) items of potential digital evidentiary value were identified, including a desktop workstation, internal storage media, network equipment, peripheral devices, and a virtual reality system.

The purpose of this assessment is to identify all digital evidence that and conduct/outline proper evidence handling procedures. I will maintain integrity, maintain chain of custody, and ensure admissibility in the court. This assessment will help investigators understand what the purpose of digital evidence is and what the next step will be in the analysis process.

Synopsis

Law Enforcement provided the following questions.

1. What items are you seizing?
2. What is the purpose of the seizure?
3. How would you handle the evidence?

Evidence Collected

The section outlines all physical evidence items collected

Name	Identifier (Tag)	Description
Desktop PC Tower	DesktopTower01	Primary computing system
OculusVR Headset + 2 sensors	OculusVR01 SensorVR01 SensorVR02	Virtual reality system, with 2 wired sensors
Computer Mouse	Mouse01	Black wired gaming mouse
Corsair Keyboard	Keyboard01	Full-size black mechanical keyboard
Samsung Monitor	Monitor01	Wall-mounted flat screen display
Web Camera	WebCam01	White small camera mounted on monitor
PC Internal Storage	StoragePC01	Metal rectangular drive inside computer unit
Power Supply Cord	PowerSupply01	Black power cord attached to the Desktop PC Tower
Network Interface Card	NIC01	Internal network adapter card
Graphics Card	VideoCard01	Large circuit board with cooling fans
Wireless Router	Router01	Black router with four antennas with cord attached

This section provides details of the digital evidence collected

Tools Used

The following outlines the workstations and all hardware and software used for this investigation.

Workstation

Hostname	Operating System	Build	Physical / Virtual	Built
TYTUS_HOST	Windows 11	22H2	Physical/Virtual	2/19/2026

Hardware

Name	Purpose	Additional Information
Tableau USB Writeblocker	Writeblocker	Used to prevent writing to drive during imaging
External HDD	Storage	Used to store forensics images
Digital Camera	Evidence Documentation	Used to take photographs of evidence before collection

Software

Name	Version	Release	Purpose
FTK Imager	4.5	Oct 08, 2020	Used to image seized devices
Autopsy	4.19.1	Unknown	Used to analyze static images
Wireshark	4.0.0	Feb 2022	Used to analyze network traffic
Volatility	2.6	Jan 2021	Used for memory forensics

Case Information & Observables

This case involved collecting, processing, and analyzing digital evidence which was obtained from a search warrant. The evidence was collected from a suspect in a Child Sexual Abuse Materials (CSAM) case from their home address: 123 Something St, New York, NY. The following are my observations and responses to the Law Enforcement's questions.

Observables

Q1 What items are you seizing?

The PC tower, PC power cord, OculusVR headset + 2 sensors, Computer mouse, Corsair keyboard, Samsung monitor, web camera, PC internal storage, power supply cord, network interface card (NIC), graphics card, wireless router belonging to the suspect were acquired at the suspect's desk.

Figure 2 - Image of Oculus headset at the suspect's desk

Figure 3 - Image of Oculus sensor #1 at the suspect's desk

Figure 4 - Image of Oculus sensor #2 at the suspect's desk

Figure 5 - Image of computer mouse at the suspect's desk

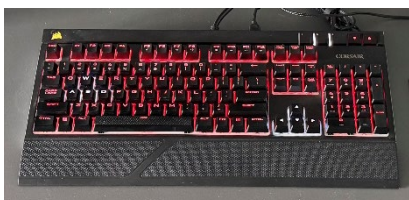

Figure 6 - Image of the keyboard at the suspect's desk

Figure 7 - Image of Samsung monitor at the suspect's desk

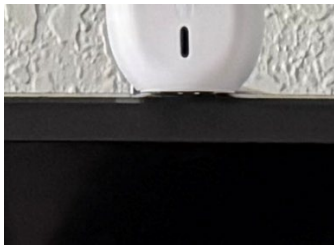

Figure 8 - Image of web camera at the suspect's desk

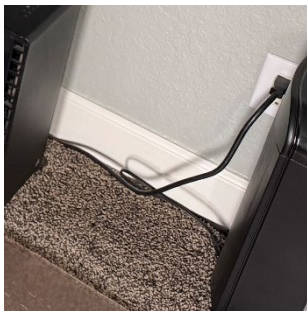

Figure 9 - Image of PC's power cord at the suspect's desk

Figure 10 - Image of wireless router at the suspect's desk

Q2 What is the purpose of the seizure?

The purpose of the seizure was to collect and preserve the laptop as evidence for forensic analysis, ensuring that all data could be examined without being lost or tampered with.

Q3 How would you handle the evidence if you were there?

If I were there, I would carefully document and photograph the evidence at the suspect's desk. I would collect all the evidence and extract the internal hard drive from the PC. During the collection I would be wearing latex gloves and carefully handling the evidence and securing it in evidence collection bags. I would use a write-blocker when collecting and processing data from the PC and hard drive. I would also maintain a strict chain of custody throughout the investigation.

Conclusion

In this investigation, the evidence from the suspect's desk was successfully collected, preserved, and analyzed using proper forensic procedures. All observations were documented, and no signs of tampering, unauthorized access, or data loss were found. The tools and methods used ensured the integrity of the evidence, supporting reliable analysis and accurate responses to the Client's questions. Maintaining proper chain of custody and evidence handling procedures remains critical for preserving the credibility of forensic findings.
