

ASSIGNMENT - WORKSTATION IMAGE EXAMINATION III - TSK/WINHEX/TIMELINES

OVERVIEW

Some corporate documents were stolen from an executive's workstation and posted on a competitor's website. Your firm has been hired to perform the analysis. A forensic image of the workstation has been provided.

INSTRUCTIONS

 Case Number: YY-T005

The contents of the document **m57biz.xls** was found on a competitor's website. Verify this document exists on this disk and provide key forensic data. Also create a forensic timeline of the folder containing all user profiles, do not include operating system data. Here is a screenshot of the data on the competitor's website.

At times, a customer may have additional questions and request additional information. For this assignment, you will perform your analysis; however, you will add your findings to an existing report.

This is a continuation of the previous assignment. You will be updating your previous report! Failure to follow these steps will result point deductions. The following information needs to be added to your previous report:

- Document revision

- Executive summary updated
- Questions added to the synopsis
- Observables and investigator processes updated

For this case, we will use the Sleuthkit to answer the following questions.

QUESTIONS
