

ASSIGNMENT - PROCESSING USB DRIVE

OVERVIEW

You are onsite to an active crime scene investigation. One of the investigators found a USB thumb drive and asked you to catalog it as evidence. Your assignment is to properly catalog the evidence on scene - phase one, then store it back at your office (home) - phase two. Your instructor will provide to you the following items:

- USB thumb drive
- Envelope
- Evidence tag
- Evidence tape
- Gloves

You will only handle evidence with gloves on, any infraction will be **50 points off your assignment**. Loss or destruction of this evidence will result in a **100 point deduction from this assignment**.

INSTRUCTIONS

Case Number: YY-T003

Phase One

1. You will take photo graphs of the evidence as you have found it
2. You will completely fill out the evidence label in ink
3. You will place the evidence label on the envelope
4. You will place the USB drive in the envelope and seal it
5. You will place evidence tape over the flap of the envelope
6. You will take a photo of the front and back of the envelope with evidence in it
7. You will document all procedures done and other relevant information in your Rocketbook
 - Sketches
 - Description of drive

Phase Two

1. You will take a photo of the front and back of the envelope prior to opening it
2. You will store the evidence in a safe location till used in a future assignment

QUESTIONS
